PaperX Tube

Go Paper. Save Plastic.

Introducing PaperX Tube: the **sustainable packaging solution** that sets your product apart!

With its fiber-based composition, PaperX Tube offers a refreshing alternative to plastic tubes, helping you attract the next generation of eco-conscious consumers while meeting your sustainability goals.

Choose PaperX Tube and **reduce your plastic consumption by 46%** compared to traditional COEX tubes. You'll also **reduce your carbon footprint by 24%**.

Contribute to a sustainable future by using renewable resources: The tube body is made of **80% paper from FSC-certified forests**.

Experience the new generation!

With PaperX, your brand is on the right path. It features a **pleasant and smooth texture** that is visually appealing during presentation. Its **tactile properties** offer customers a **special experience** in-store and at home, making it an ideal option for natural and organic products.

Excellent Sealability

The sealability of the PaperX Tubes was rigorously **tested on IWK's standard tube filling and sealing equipment** in October 2023, marking a significant achievement and validation of Neopac's breakthrough.

The results are impressive - The **PaperX tube achieved commendable sealing results**. Overcoming the historical challenges of **sealability in fiber-based tubes**, the PaperX Tubes, with their proven weldability and strength, represent a significant milestone in the evolution of sustainable packaging.

Dream big when it comes to printing!

Limitations? Hardly any!

Show off your **unique designs**! We offer all **flexo and digital printing** options: virtually unlimited
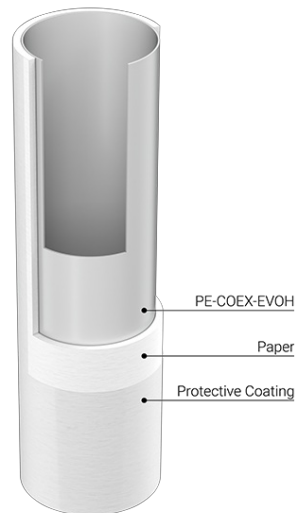

customization and **eco-friendliness** with instant printing and **personalized** tubes thanks to variable data.

The new generation PaperX makes no compromises: they can be **easily filled and sealed on standard tube filling machines**.
