

Eco-Stripped Tube

Eliminate excessive material

Lightweighting recapped

The Eco-Stripped Tube weight loss program that we offer for your tubes is based on the concept of wall, shoulder and cap design reduction. Save up to 30% virgin material on Mono and Coex tube variants, by undressing your tube from excessive material and drive your brand towards sustainability.

No excessive material, only the essentials!

Optimal solution to reduce your carbon footprint

*Data reference: 1 million tubes, sleeve only, D50, 210mm length LCA calculated by GaBi Packaging Calculator, Version 3.0

Designed for Packaging reduction

- Cut our use of virgin plastics
- Curtailed transportation costs
- Decrease carbon footprint
- May reduce your EPR fees

Applications

- Skin Care
- Skin Health
- Hair care
- Toothpaste
- Dentifrice

Specifications

MATERIAL

Body

PE

RECYCLED

with or without EVOH layer

Shoulder

HDPE or rHDPE

Closure

Flip-top PP

DIMENSIONS

Diameter 35/40/50 mm

Wall thickness 0.35 mm

(30% reduction compared to standard PE tubes)

Content 40 - 300 ml

DECORATION

Offset print

Silkscreen print

Digital print

Hotfoil stamping

CERTIFICATION

Food grade material

SUSTAINABILITY

We estimate that in our own packaging manufacturing operations, the new tubes will eliminate the

need for up to 7.7 tons
of HDPE and PP materials per
one million tubes produced.

Undress to progress?

We calculate your carbon footprint when switching to Eco-Stripped
