

NeoDose™ Solo

The consumer experience

NeoDose™ Solo combines a monomaterial tube with a PE pump and is designed for easy recyclability. The design enables a sustainable packaging solution without compromising the usual ease of use.

The integrated MDO-PE-EVOH barrier reliably protects sensitive formulations from oxygen and moisture. This keeps products stable, fresh and effective throughout their entire shelf life.

Airless technology ensures precise and consistent dosing. Each press dispenses a controlled amount of product, supports hygienic removal and reduces product loss until the last pump.

NeoDose™ Solo combines functional product protection, intuitive use and a clearly traceable sustainability solution, offering efficient and reliable packaging for modern skincare products.

Advantages

- Mono material design enables full recyclability in HDPE streams
- MDO PE EVOH barrier provides strong protection for sensitive formulas
- Airless pump ensures hygienic dispensing
- Precise and consistent dosing with every pump
- Low product waste thanks to efficient restitution
- Supports premium decoration for a high-quality appearance

Applications

- Face Care
- Make-up
- Beard grooming/Men Care
- Eye creams and treatments
- Serum
- Cosmeceuticals
- Dermocosmetics
- Sun Protection
- Baby Care
- Targeted treatments

Specifications

MATERIAL

Tube	Polyfoil ® MMB
Pump material	PE
Cap	PE

DIMENSIONS

Diameter	25 mm
Length	70 – 145 mm
Content	15 – 50 ml
Dosage	150 µl/stroke

DECORATION

Offset print
 Silk screen print
 Hotfoil stamping
 Varnish: glossy, satin,
 matte

CERTIFICATION

Quality Food grade
