

Polyfoil® Dropper

Perfect droplets

The unbreakable dropper tubes control the contents and ensure precise application. Regardless of the pressure on the tube, the formation of the droplets always remains the same and the amount of the exiting liquid remains constant. Thanks to the cannula, a liquid or semi-liquid product reaches the desired location – hygienically and cleanly. The Polyfoil® barrier laminate protects the contents against oxygen, light and water vapour and ensures that all active ingredients stay in the product.

Specifications

MATERIALS

Tube	Polyfoil®
Nozzle / Screw head	HDPE
Dropper insert	PP

DIMENSIONS

Diameter	13.5/16/19/25 mm
Content	3 – 50 ml
Drop size (water)	31/55/65/75/90 µl (depending on formula)
Caps	Child resistant Miniwing™ Screw cap Metal cap

DECORATION

Offset print
Silk screen print
Hotfoil stamping

CERTIFICATIONS

Quality	Pharma grade Food grade
Sterilizable	Yes

Varnish

Glossy
Satin
Matte
