

PICEA™ wood tube

Packaging for sustainable natural cosmetic and dental products

Environmentally friendly packaging is very important to us. That's why Neopac's materials development team has created the PICEA™ tube containing spruce.

With our wood tube, we are offering you a **high-quality packaging** solution, through which you can highlight the **natural and sustainable aspects** of your product. Let your customers **feel the difference**, as the fine wood grain makes the surface of the tube feel slightly rough.

Significantly improved environmental impact thanks to renewable resources

Over **95% of the materials** used in the PICEA™ wood tube are from **renewable resources** - the proportion of spruce wood is 10%, the sugar-based proportion is 85%. The processed spruce comes from certified forests in the EU. The wood comes from sawdust created by German carpenters.

The PICEA™ wood tube has a **carbon footprint** that is 40% better than a conventional PE tube. At the same time, it offers the same qualitative characteristics in terms of barrier properties, decoration, food suitability and recyclability.

Applications for the PICEA™ wood tube

- Natural cosmetics
- Organic cosmetics
- Skincare products
- Haircare products
- Hand cream
- Body lotion

Specifications

MATERIAL

Body	PICEA™ (Mono or COEX)
Shoulder	HDPE
Head, Closure	Screw and push-on caps PP and HDPE

DIMENSIONS

Diameter	16/19/25/30/35/40/50 mm
Wall thickness	0.4/0.5 mm
Content	5 - 300 ml

DECORATION

- Offset printing
- Silk screen printing
- Digital printing
- No varnish required

CERTIFICATION

ECOCERT, COSMOS

SUSTAINABILITY

- >95% of the materials used are from renewable resources
- 40% better carbon footprint than a conventional PE tube

QUALITY

Food grade EU No. 10/2011
