

# Stylo™

## The new way of writing skincare

The Stylo™ tube rewrites your product's success story in a choice of three different applicators: the Stylo™ Liner – meticulous, the Stylo™ Pipette – precise, and the Stylo™ Bristle, which softly strokes the skin. Apply liquid and semi-solid skincare products easily and precisely. The aesthetic ring ensures correct discharge and protects the product. Consumers intuitively understand how to turn the ring thanks to the arrow pictogram. The cone-shaped cap protects the applicator. Start a new product story with Stylo™.

### Applications for the Stylo™ Liner

- Anti-aging applications, e. g. wrinkle filler
- Make-up applications
- Creams for small blemishes and impurities

### Applications for the Stylo™ Pipette

- Serum for pigmentation and aging spots
- Anti-aging formulations for eyes, lips and décolleté
- Serum for hair ends
- Cuticle serum/oil
- Brightening tooth gel
- Dietary supplement
- Anti-pruritic products

## Applications for the Stylo™ Bristle

- Concealers/lotions
- Nail care
- Eyebrow care
- Acne cream
- Disinfectant solutions for piercings
- Scar care
- Mouth and teeth products

## Advantages

- Precise application for different viscous products
- Easy-to-clean, hygienic applicators
- Intuitive ergonomic tubes with «pen» look
- Ring, cover and cap can be designed to customer specifications
- The ring ensures discharge and product protection
