

Polyfoil® Twist'n'use™ soft long nozzle

Twist. Squeeze. Protect pain free.

The innovative Twist'n'use™ system, designed with simplicity and user-friendliness in mind! This unique system simplifies the application process, making it easy for consumers. By twisting the closure, the pin inside releases the liquid or cream, enabling precise application to the desired area.

What makes Twist'n'use™ soft long nozzle stand out is its gentle approach, particularly when treating sensitive areas on both humans and animals. Thanks to its soft and flexible nozzle design, it provides easy access to delicate areas like the eyes, mouth, or ears, ensuring a targeted and gentle application that minimizes the risk of discomfort or injury.

Advantages

- Flexible nozzle allows access to sensitive areas
- Precise application of the product
- Easy to open, no risk of injury, no loose parts
- High barrier properties for sensitive, preservative-free contents
- No contamination of the contents
- Hygienic single-dose application
