

# Polyfoil® Twist'n'use™

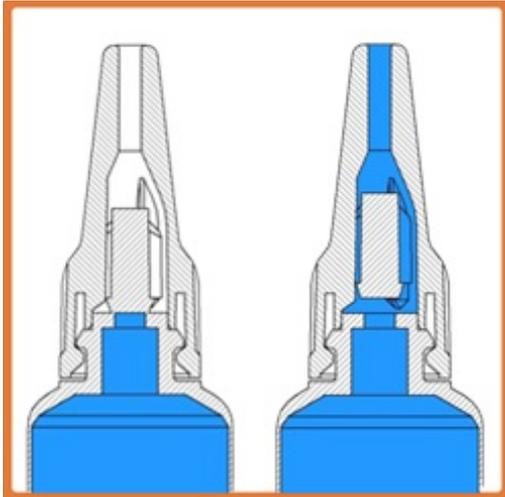

**Twist. Squeeze. Treat targeted.**

This novel Twist'n'use™ system gains by its simplicity for the consumer. By twisting the closure the pin inside releases and the liquid or cream can be applied precisely to the area to be treated.

## Advantages

- Easy to open, no visible rupture points, no risk of injury, no loose parts
- High barrier properties for sensitive, preservative-free contents
- No contamination of the contents
- Longer shelf life compared to conventional PE / PP packaging
- Tamper-evidence by means of internal twist-off pin
- Targeted application of the product
- Hygienic single-dose application

## Pharmaceutical applications

- Animal health
- Topical applications
- Ointments (ear/nasal/rectal/vaginal)
- Dietary supplements
- Concentrates/laboratory substances
- Scalp treatments
- Superglue
- Flavourings
- Product samples
- Travel sets

## Cosmetic applications

- Skin cosmetics (special care of impurities, facial and eye care)
- Cosmeceuticals (anti-aging, regeneration and vitamin treatments)
- Dental/bleaching treatments
- First aid (cremes, gels)
- Hair and scalp treatments
