

Airless Tube Evolux/Evoclassic

Airless de luxe

Neopac has expanded its airless pump tube range. The Aptar pumps «Evolux» and «Evoclassic» combine elegance and luxury with a particularly gentle action. The airless system closes the pump automatically and provides excellent protection for the contents. With the proven Polyfoil® barrier your product is optimally protected from air, sun and humidity.

Advantages

- Ideal for preservative free formulas
- High barrier for sensitive contents
- Ultra soft actuation on the tube
- Many possibilities to decorate the pump
- Precise and consistent dosing
- Easy and clean in use

Advantage of the cartridges

EVO 240

- Robust housing made of PBT

- Low actuation force
- Precise and progressive dosage
- Dispensing of a wide range of viscosity Alpha 150
- Compatibility due to metal-free contact
- Resistance to the formulae charged in pigments or other solid particles

Alpha 150

- Compatibility due to metal-free contact
- Resistance to the formulae charged in pigments or other solid particles

Specifications
