

Sugarcane Tube

Save plastic and eliminate waste with our tube made of renewable resources!

The sugarcane tubes or bioplastic tubes are a highly environmentally friendly type of packaging and therefore particularly suitable for your natural and cosmetic products; the carbon footprint of a sugarcane tube is **30% better** than that of a conventional PE tube.

If the tube is empty, the consumer recycles the tube in the same way as conventional PE tubes. Neopac's sugarcane tube is an environmentally friendly alternative to the standard PE tube and offers the same qualitative barrier, decorative or recyclable properties.

5 good reasons to choose tubes made from sugarcane

- Protects non-renewable resources
- The carbon footprint is 30% better than a PE tube
- The sugarcane tube body is 100% recyclable
- Sugarcane absorbs CO₂ from the atmosphere
- Suitable for food

Applications for the sugarcane tube

- Natural cosmetics
- Skin care products
- Hair care products

Specifications

MATERIAL

Body	Sugarcane COEX
Shoulder	Sugarcane PE
Head, Closure	Screw and push-on head, HDPE screw and flip top cap

DIMENSIONS

Diameter	16/19/25/30/35/40/50 mm
Wall thickness	0.35/0.4/0.5 mm
Content	5 - 300 ml

DECORATION

Offset print
Silkscreen print
Digital print
Hotfoil stamping

CERTIFICATION

ECOCERT, COSMOS

SUSTAINABILITY

30% better carbon footprint than a PE tube

QUALITY

Suitable for food
