

Polyfoil® Sensation - Luxury meets eco-friendly design

Discover luxury and sustainability with our fully recyclable tube solution

Make your tube recycling-ready by 2025

Our new extension of our mono-material range has a better environmental impact by using full PP materials comply with the PP recycling scheme! We blend innovation, functionality, and sustainability, we enable our customers to address evolving market demands while advancing towards a greener, more sustainable future.

Enhanced barrier properties

Polyfoil® Sensation combines superior barrier properties with recyclability, providing optimal product protection. Our laminated PP tube with metallized MDO and PP-EVOH barrier ensures exceptional product longevity and freshness, essential for maintaining the highest quality in cosmetics and beauty.

High-definition decoration

In addition to its outstanding barrier properties, also offers high-definition decoration. Visually appealing, with a unique, elegant metallic or softtouch feel, 360° decoration.

Recycled, recyclable and optimized CO2 footprint

Polyfoil® Sensation has a CO2 footprint of 42% compared to standard coex tubes. Recyclability rating of "Grade C" from Recyclclass. The tubes can be easily and efficiently recycled, further reducing its environmental impact and making it an ideal choice for companies wanting to reduce their carbon footprint and promote.
