

Polydose™ Airless Tube

Easy, precise and consistent dosing

We offer a thoroughly impressive airless solution for oxygen-sensitive pharma products. Elegant and with a self-sealing actuator, it avoids hardened product residues in the pump. In this way, the Polyfoil® high oxygen barrier in combination with the Aptar airless pump form a dependable team in every application position for the range of 15 ml to 75 ml.

Advantages

- High barrier for sensitive contents
- Easy and clean in use
- Precise and consistent dosing
- A valve keeps the orifice clean and sealed
- No special conditions required for the filling process
- Good residual emptying
- No metal parts
- Easy to carry for frequent travellers
- Comfortable application (360°)
- Possibilities to decorate the pump

Cosmetic applications

Suitable for all oxygen-sensitive lotions/crèmes, for maximum convenience and precise dosing of products such as:

- Make-up
- Skin and hair care
- Sunscreens
- Body lotions
- Face care

Pharmaceutical applications

- All oxygen-sensitive lotions
- UV-sensitive products (sunscreens)
- Products requiring a precise dosing
- Viscous products
- Dermatological/topical products
